Project Title: Persimmon Website

I'd like for this website to have multiple pages, with a focus on visual elements (photography, abstract shapes) to portray the persimmon fruit along with the article text:

- **Homepage:** Intro (name, etymology, simplified description)
- **Species:** showcase various select species of persimmon
- **Fruit Specifics:** additional more detailed info (and the rest of the description section) on the persimmon fruit, explaining astringent vs nonastringent persimmons.
- **Nutrition:** Nutrients and phytochemical content
- **Products/Culinary Uses:** Dried fruit as snack (hoshigaki/柿饼/gotgam), Korean sujeonggwa, gamsikcho, persimmon pudding, etc.
- **Sources**
